ANNOUNCEMENT

GambleAware publishes a gambling-related suicide invitation to tender

London, 13 September: GambleAware has launched a rapid invitation to tender for a gambling-related suicide data analysis and scoping study.

The goal of the project is to provide greater insights into the prevalence of suicidality where gambling difficulties or gambling-related harms are also present, focusing on analysis of existing data sets, and also to identify the scope for a second phase of research to understand in more depth the interrelationships between suicidality and gambling-related harm.

Further information, including the invitation to tender and the research brief can be found [here](#).
